PROFESSIONAL EXPERIENCE

Senior Technical Operations Manager — EPC Tech Pvt. Ltd., Mumbai

Jul 2025 – Present · Healthcare-Tech · Team Lead · 20+ concurrent projects

- Spearhead the organisation's technology and operations strategy by owning end-to-end delivery of 20+ AI, automation, and digital transformation initiatives aligned to business priorities across BU, HR, Product, and Commercial teams
- Govern the full project lifecycle (ideation → PID → development → deployment) for all technology initiatives; introduced structured project tracking via Jira and Confluence, improving delivery visibility and accountability across functions
- Championed organisation-wide AI adoption by leading the AI Refresher Video programme, coordinated AI model development of key stakeholders, and drove HR legal compliance for AI use across EPC Tech employees
- Directed the strategic rollout of ILD Connect, a regulatory-aligned digital platform, aligning legal, marketing, and BU stakeholders across multiple departments to meet compliance and go-to-market timelines
- Architected and deployed 15+ automation solutions across HR, operations, and commercial functions along with reducing collective manual effort by 80–90% and cutting turnaround time from hours to minutes
- Represented EPC Tech at national industry events like JWS (AI in commercial pharma) and GU ASCO Conference, Bangalore to identify digital innovation opportunities and bring insights back to the technology roadmap
- Currently leading early-stage discovery for a COPD Diagnosis App, working with the BU on clinical requirements and technical scoping positioning the organisation at the intersection of AI and healthcare
- Exploring AI agent integration via MCP Server and Neptune DB (Gremlin) to build next-generation graph-data workflows for the organisation

Senior Software Engineer — STIGYA (promoted from Python Developer)

Jul 2022 – Sep 2024 · Tech Services · Cross-functional team of 15 · HK/US client

- Promoted from Python Developer to Acting Project Manager within 8 months and recognised for technical delivery quality and client communication ability with an international client (Gya Labs, Hong Kong/US)
- Led a cross-functional team of 15 (developers, testers, UI/UX designers) with accountability for sprint planning, delivery timelines, requirement alignment, and client satisfaction
- Established Agile delivery processes from scratch by introducing sprint ceremonies, stakeholder reporting cadences, and process standardisation that improved team velocity and on-time delivery

- Managed end-to-end client relationship for an automation project scraping Amazon.in product performance data and translating raw data insights into actionable inputs for the client's marketing team

Senior Software Engineer → Acting Tech Lead — Tata Consultancy Services

Aug 2016 – Jun 2022 · BFSI · 4 global banking clients · 6 years

- Nordea Bank (Acting Tech Lead) — Led a team of 3 engineers; owned coordination between developers and testers, managed Unix deployments, and produced monthly performance reports for senior banking stakeholders
- Luminor Bank — Primary owner of the Deposit module in a Progress 4GL banking system built from ground up; accountable for requirement adherence and delivery quality
- ABN AMRO — Managed daily system performance reporting and communicated code change impacts to business stakeholders across AS400 and WTX environments
- Citibank US — Handled inbound credit card operations for US customers over 18 months; achieved 5/5 performance appraisal — recognised for service quality and issue resolution

Technical Support Representative — Fidelity National Information Services (FIS)

Aug 2014 – Jan 2016 · BFSI · L1/L2 Support · Best Performer

- Managed full IT support ticket lifecycle for senior associates by triaging, resolving, and escalating to hardware teams; achieved consistent SLA adherence using CMS, Active Directory, VPN, and Change Management tools
- Recognised as Best Performer for technical problem-solving efficiency and quality of stakeholder support

LEADERSHIP & STRATEGIC IMPACT

- Built and scaled technology operations function at EPC Tech by establishing project governance, cross-functional collaboration structures, and a culture of AI-led continuous improvement
- Consistently promoted ahead of peers and moved from Support → Developer → Acting Project Manager → Senior Manager across career, reflecting leadership potential recognised by multiple organisations
- Instrumental in bridging the gap between business and technology at every organisation by translating operational pain points into structured, deliverable technology solutions
- Championed ethical AI adoption at an organisational level by leading awareness programmes, compliance alignment, and structured rollout of AI tools in a regulated healthcare environment
